## **COSTRUZIONI** Dati di Saie Piemonte **Fatturato in crescita per 7 imprese su 10**

In Piemonte, aumenta il fatturato di 7 imprese della filiera costruzioni su 10. Il dato arriva dall'Osservatorio Saie Piemonte. Ne emerge che la filiera edile del Piemonte è in buona salute. Lo dimostrano

soprattutto due dati: la soddisfazione per il portafoglio ordini, giudicato adeguato dalla cifra record del 94% delle imprese, e il numero di aziende che, nell'ultimo anno, hanno dovuto rinunciare a dei lavori per eccesso di richieste che superano la capacità produttiva, ben il 95%. Un fattore, quest'ultimo, che ha portato metà delle imprese rinunciarie ad assumere ulteriore personale (50%). Ma c'è di più:

per 7 aziende su 10, l'ultimo quadrimestre ha segnato un aumento del fatturato, con il 33% del totale che ha assunto nuovi lavoratori. Forte, inoltre, l'impatto del Superbonus 110%, che ha supportato il giro d'affari di oltre metà del campione (53%). Ora le imprese sperano in un'estensione della durata e in una riduzione della burocrazia/documentazione richiesta.
